

Table 5: Drugs Causing Noncardiogenic Pulmonary Edema or Acute Respiratory Distress Syndrome

Syndrome	Drug
Noncardiogenic pulmonary edema	Amphotericin
	Anti-inflammatory drugs <ul style="list-style-type: none"> • Aspirin • Nonsteroidal anti-inflammatory drugs
	Cardiovascular agents <ul style="list-style-type: none"> • Calcium channel blockers • Epinephrine • Phenylephrine • Noncardioselective beta adrenergic blockers • Hydrochlorothiazide
	Cocaine
	Neuropsychiatric medications <ul style="list-style-type: none"> • Phenothiazines • Tricyclic antidepressants
	Opiates <ul style="list-style-type: none"> • Morphine • Methadone • Heroin
	Tocolytic agents <ul style="list-style-type: none"> • Terbutaline • Albuterol • Ritodrine • Fenoterol • Isoxuprine
Acute Respiratory Distress Syndrome	Amiodarone (after surgery or pulmonary angiography) Nitrofurantoin
